INTERNATIONAL JOURNAL OF MASS SPECTROMETRY AND ION PROCESSES, VOLUME 86 (1988)

SUBJECT INDEX

acetylacetonates
  a study of doubly charged ions in aluminum and iron—329
alkanoic acids
  low-energy, low-temperature mass spectra. Part 11. The spectra of the—227
N-alkylpyridinium salts
  matrix effects on the formation of beam-induced adduct ions during fast atom bombardment of—155
$^{40}ArH^+$
  observation of rotational predissociation in $^{20}NeH^+$, $^{22}NeH^+$, $^{20}NeD^+$—and D_2^+ formed from various precursors 401
atomic mass
  evolution of the unified scale of—, $^{12}C = 12$ u 1

$[Cd(SC_6H_4CH_3\text{-}4)_2]_\infty$
  plasma desorption mass spectra of the three-dimensionally non-molecular material—. Formation of cadmium-containing cluster ions 273
$CFCl_3$
  double ionization energies of the chlorofluoromethanes CF_3Cl, CF_2Cl_2 and—determined using double-charge-transfer spectroscopy 341
CF_2Cl_2
  double ionization energies of the chlorofluoromethanes CF_3Cl, —and $CFCl_3$ determined using double-charge-transfer spectroscopy 341
CF_3Cl
  double ionization energies of the chlorofluoromethanes—, CF_2Cl_2 and $CFCl_3$ determined using double-charge-transfer spectroscopy 341
$C_5H_6^+$
  photodissociation spectroscopy of several—isomeric ions 387
charge reversal processes
  pressure dependence of—287
$(CH_2CH^{\cdot 2+})$
  the vinyl dication—: classical or bridged? 319

$^-CH_2CHO$
  does $MeCO^-$ undergo 1,2-hydride ion transfer to yield—in the gas-phase? The application of experiment and theory in concert 217
collisionally activated molecular fragments
  a mass spectrograph for the analysis of—53
$C^+(^4P_g)$
  translational energy spectroscopy of beams of $C^+(^2P_u)$ and—ions 369
$C^+(^2P_u)$
  translational energy spectroscopy of beams of —and $C^+(^4P_g)$ ions 369
CS_2
  the—dication 351

D_2^+
  observation of rotational predissociation in $^{20}NeH^+$, $^{22}NeH^+$, $^{20}NeD^+$, $^{40}ArH^+$ and—formed from various precursors 401
dimethylanisoles
  fragmentation reactions of the singly and doubly charged molecular ions of—303

FAB spectra
  mechanism of formation of—169
four sector mass spectrometer
  enhanced mass resolution without decrease of beam intensity in a—83

halogen-substituted alkyl ions
  stabilization energy and positional effects in —209
hybrid tandem supersonic beam mass spectrometer
  a—for the study of collision-induced dissociation of ions in the energy range < 1 to 3000 eV 61
hydrophilic peptides
  analysis of mixtures of—by continuous-flow fast atom bombardment mass spectrometry 187

ion/molecule reactions
  investigation of asymmetric gas-phase—by FT-ICR spectrometry 249

large mass spectra
simultaneous detection of—using unequally spaced multichannel plates in double exposure 21

$MeCO^-$
does—undergo 1,2-hydride ion transfer to yield $^-CH_2CHO$ in the gas-phase? The application of experiment and theory in concert 217
metastable ions
mass spectrometry of—and stereochemistry of steroids 121
$(M + H)^+$ ions of peptides
collision-induced fragmentation of—. Side chain specific sequence ions 137

$^{20}NeD^+$
observation of rotational predissociation in $^{20}NeH^+$, $^{22}NeH^+$,—, $^{40}ArH^+$ and D_2^+ formed from various precursors 401
negative frequency peaks
mass shifts induced by—in linearly polarized Fourier transform ion cyclotron resonance signals
$^{20}NeH^+$
observation of rotational predissociation in —, $^{22}NeH^+$, $^{20}NeD^+$, $^{40}ArH^+$ and D_2^+ formed from various precursors 401

$^{22}NeH^+$
observation of rotational predissociation in $^{20}NeH^+$,—, $^{20}NeD^+$, $^{40}ArH^+$ and D_2^+ formed from various precursors 401
new ion source
a—for the study of angle-resolved mass spectra 109
o-nitrotoluene ions
the dissociation dynamics of energy selected —357

organic nitroaromatic ions
a new example of internal oxidation of remote groups in—235

steroids
mass spectrometry of metastable ions and stereochemistry of—121
sulfonenamide
formation of a new C–C bond in a—upon SO_2 elimination induced by electron impact ionization 201

tandem double-focusing mass spectrometer
an improved—for neutralization–reionization and collisional activation studies 95
2,2,6-trimethylcyclohexanone
dissociation of protonated—and related compounds upon high and low energy collisional activation 253
